

CT Energy Incentives

Compiled by the CT Energy Network

Rewiring America has a calculator explaining which incentives (mostly state) remain. <https://homes.rewiringamerica.org/save>

A Home Energy Solutions (HES) visit is currently \$75. It's the fastest, cheapest way to reduce your energy bill. Eversource's HES is at [EnergizeCT.com/energy-evaluations/HES](https://energizect.com/energy-evaluations/HES)

Solar. While the 30% Fed Tax Credit to *purchase* solar is gone for homeowners, *leases or power purchase agreements* will allow licensed solar vendors to factor in this credit until 12/31/27. Find Solar vendors at CTEnergyNetwork.org

Read up on the Pros and Cons of Purchasing, Leasing, & PPAs for Solar. Please research carefully! Even without the credit, purchased solar remains one of the cheapest long term forms of energy.

Energy Storage Solutions (Batteries). Follow this link for the latest on changing compensation for battery purchase and for dispatching to the grid during high demand. <https://energystoragect.com/energy-storage-solutions-for-buildings-communities/>

Electric Vehicle Incentives. EVClubCT.com has the latest = incentive news for EVs and EV Chargers, and also on incentives to offset EV charger installs and compensation for charging off peak.

Smart-E Loans. CT Green Bank loans are still available for over 90 energy and home healthy upgrades.

<https://www.ctgreenbank.com/home-solutions/smart-e-loans/>

Rebates for Energy Upgrades. Commercial, Residential, and Multifamily buildings can receive rebates for some energy ■=> upgrades at EnergizeCT.com. An HES visit (other side) may be required.

Energy Assistance Programs. To assist households in need, one-on-one guidance is available at: nhsofnewhaven.org/homeenergyconnect/

CPACE (Commercial Property Assessed Clean Energy).

CPACE is an upfront financing mechanism for energy efficiency, renewable energy, or other related projects. Towns must enable this. Repayment is made via the property tax bill. CTGreenBank.com/building-solutions/c-pace
